

# Task Guide

- Open D2L chapter 5: Multilayer Perceptrons [here](#)
- Run each code block with Google Colab (5.1-5.7)
- Add your name and NPM
- Install d2l library before running the code with `!pip install d2l``

```
Nama: Jaisy Arasy
```

```
NPM: 123456789
```

```
[ ] !pip install d2l
```

```
[ ] %matplotlib inline
import torch
from d2l import torch as d2l
```

- If there's any error while running the code try asking ChatGPT for fix
- If you need further guidance kindly ask in our group or mentor :)
- Have fun!

# Submission Guide

- Save your Python notebook to GitHub by following this [tutorial](#)
- Make sure the repository is public
- Don't forget to change the notebook name to `TaskWeek2`
- Submit your work [here](#)
